

Meareg Teame

Full-Stack Web App Engineer

male, 21

Bahir Dar, Ethiopia

☎ +251974158040

✉ hello.meareg@gmail.com

About me

I'm a software engineer focused on building production-ready web applications from idea to launch.

I enjoy turning real business problems into practical, reliable products and working across both frontend and backend development. I'm comfortable taking ownership of features, learning quickly, collaborating with teams, and delivering working solutions under real-world constraints.

I'm particularly interested in web products, SaaS, business applications, and software that creates measurable value.

Field of work

Software Design & Development

Web development

Full-stack development

Custom software development

Artificial intelligence (AI) and machine learning (ML) development

Skills

Answering Questions | Intermediate

Applications Development | Intermediate

Ability To Take Criticism | Intermediate

Node.js | Intermediate

Agreeableness | Intermediate

Self-Awareness | Intermediate

Ability to Simplify Complex Ideas | Intermediate

JavaScript | Intermediate

TypeScript | Intermediate

Accountability | Intermediate

CSS | Intermediate

React.js | Intermediate

Delegating | Intermediate

Django | Intermediate

Express.js | Intermediate

Work Experience

● Full-Stack Web Developer

Ensign Global Consultancy - Contractual | Remote

August, 2025 - May, 2026

JavaScript

TypeScript

Accountability

CSS

React.js

- * Build and maintain production-ready web applications and business websites.
- * Develop responsive frontend interfaces and backend functionality.
- * Translate business requirements into practical, user-focused web solutions.
- * Integrate APIs and external services and troubleshoot application issues.
- * Handle development, debugging, optimization, and deployment across projects.
- * Work independently and communicate with stakeholders to deliver features from development through completion.

● Software engineer intern

Addis Software - Paid Intern | Onsite

June, 2025 - September, 2025

Node.js

JavaScript

TypeScript

React.js

Express.js

- * Contributed to the development of a payroll and ERP web application.
- * Built and integrated frontend and backend features using JavaScript/TypeScript and Node.js.
- * Collaborated with developers to implement features, fix bugs, and improve application functionality.
- * Used Git-based development workflows and task management tools in a professional team environment.

* Participated in testing, debugging, and delivering software features throughout the internship.

Portfolio

TrustGrid

Node.js

JavaScript

TypeScript

React.js

Express.js

TrustGrid is a SaaS product for businesses to showcase verified social proof and build trust with their customers. I built the web application and implemented the product experience, data-driven interfaces, and backend functionality needed to manage and display trusted business proof. The project focuses on turning real customer and business evidence into a clear, credible digital trust layer.

Create4Me

Node.js

JavaScript

TypeScript

React.js

Express.js

Create4Me is a creator marketplace and influencer booking platform designed to connect brands with creators. I built the web application and implemented the core product experience, including marketplace interfaces, creator workflows, and business-facing functionality. The project demonstrates my ability to take a product concept and turn it into a functional web application.

Torra Realestate

Node.js

JavaScript

TypeScript

React.js

Express.js

A full-featured real estate web platform for property discovery and client inquiries. Built advanced property listings and search functionality with server-side rendering and an SEO-focused architecture. The platform is designed to provide a fast, responsive experience while making property information easy to discover and manage.

Enight Global Consultancy

Node.js

JavaScript

TypeScript

React.js

Express.js

Rebuilt a corporate consultancy website from the ground up using a modern frontend architecture and Headless WordPress. Implemented server-side rendering, structured content management, responsive interfaces, and SEO improvements to create a faster and more maintainable production website.

Yaricho Senior Home Care

Node.js

JavaScript

TypeScript

React.js

Express.js

A healthcare services website and patient inquiry portal designed to help visitors understand available services and submit booking and care requests. Built a responsive, mobile-friendly interface with clear service presentation, inquiry workflows, and an architecture optimized for usability and performance.

Education

Bahirdar Institute of Technology

Information technology

February, 2023 – June, 2026

Certification

ALX 12-Month Software Engineering Program

ALX

February, 2025

Completed the ALX 12-month Software Engineering Program with a focus on backend development and practical software engineering. The program involved intensive hands-on work in programming, algorithms, data structures, backend development, databases, APIs, Git, problem solving, and building software projects.

Language

Amharic

Native / Bilingual proficiency

Tigrinya

Native / Bilingual proficiency

English

Full professional proficiency

CERTIFICATE OF COMPLETION

This is awarded to

Meareg Teame

For completing a 12 Month ALX Software Engineering Programme with a specialization in Back-end.

A handwritten signature in white ink, appearing to read "Fred Swaniker", positioned above the name and title of the Founder & CEO.

FRED SWANIKER
Founder & CEO, AL Group

A handwritten signature in white ink, appearing to read "Julien Barbier", positioned above the name and title of the Chief Product Officer.

JULIEN BARBIER
Chief Product Officer, ALX

Date of issue: 12th February 2025

Program completion date: 8th February 2025
